

Sparkler & ASQ: What Happens Next?

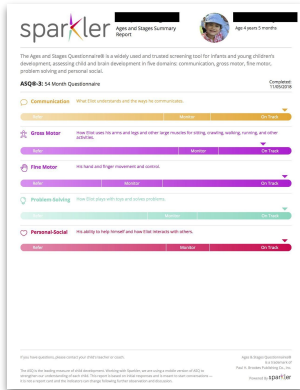

When you visit Sparkler, you will find the correct Ages & Stages Questionnaires® (ASQ) for your child, based on his/her age. ASQ is a developmental screening tool for young children. Answer all the questions! You can start and stop or tap the grid in the upper right to skip from section to section. When finished, press “submit.”

Your Program

211 Child Development and your school/program sees your child's completed screening results.

Someone from your school/program or a care coordinator from 211 Child Development reaches out to provide results and offer support. They can connect families to programs, services, and information. If you have questions, send a message through Sparkler “Connect,” reach out to your program, or call 211 Child Development at 1-800-505-7000 Monday through Friday 8 AM to 6 PM.

If your child is eligible for extra supports, you can access needed services.

AND/OR

Keep playing/learning together with Sparkler!
